RG104 E-1 Box 128 Dec 1882-May 1883

United States Mint, Philadelphia, Penn.,

ENGRAVER'S DEPARTMENT,

December 21st 1882

Col of Loudon, Snowden

Dear Sir

I am just supplied with ten bars of 1 3/8 inches "Faster steel" through Watson & Low, which I know to be of an inferior quality and quite unfit to make dies of, As this steel is for the Nickel Coinage, which already gives more trouble than all the other Coinage put together, I think it improper to experiment with a cheap low grade of steel, and therefore deem it my duty to inform you of this change of quality of steel.

Very Respectfully Yours

Chas. E. Barber
